

Process and Innovation Engineer | Bridging User Needs, Technology and Business

As a newly graduated Process and Innovation Engineer from DTU, I bring experience in user research, consumer insights, and data-driven decision-making. Through projects and roles at Demant and LiqTech, I have developed a strong ability to transform complex findings into clear recommendations, presentations, and innovation initiatives. I enjoy working at the intersection of people, technology, and business, where insights can be turned into meaningful solutions.

Selected competencies:

- Consumer & Market Insights
- User Research
- Innovation & Product Development
- Project Coordination
- Data processing & Visualisation
- Cross-functional Collaboration

Work experience

2024-2026 **Student worker, Intern and bachelor project, Demant, Smørum**

- Planned, conducted, and reported usability studies
- Recruited participants for usability and user research studies
- Contributed to user research activities, including co-creation workshops, interviews, and surveys
- Processed and visualised user data in Excel through graphs, charts, and data analysis
- Conducted analysis of competitors' product solution
- Designed and conducted an independent competitor user study, translating findings into actionable insights presented to 25+ stakeholders.

2023-2024 **Student worker, Liqtech, Ballerup**

- Identified and qualified B2B customers
- Handled administrative tasks and coordination
- Created visual presentations and communication materials
- Conducted market and industry research to support business development activities

2023 Feb–Jun **Service employee, Kvickly, Nørrebro**

- Customer Service, Sales, Quality Assurance, Planning & Prioritisation

2022-2023 **Production worker, Veo Technologies, Nordvest**

- Assembled and integrated components for AI-powered sports cameras
- Worked in the production environment requiring manual dexterity and consistency

Education

2022-2026 **BEng in Engineering – Process and Innovation, DTU**

Interdisciplinary engineering programme focused on innovation, product development, and user-centred design. Combining engineering, business, and human insights to develop and implement solutions that create value for both users and organisations.

Bachelor thesis

Developed and tested a user-centred Figma prototype in collaboration with Demant to support hearing aid users in learning and adopting tap-control functionality.

Result: Improved user understanding of hearing aid interactions and validated the concept through user testing.

2017-2020 **STX – Science and Sports, Viborg Katedralskole**

Software & Tools

Microsoft office package, Figma, Miro, Canva, C++, Creo, Arduino, Javascript, Claude

Language

Danish: Native

English: Professional

About me

Curiosity is a driving force in both my professional and personal life. I enjoy exploring different perspectives and challenging myself by trying things I have not done before, whether that is learning a new skill, taking up a new hobby, or stepping outside my comfort zone. Outside of work and studies, I value spending time with family and friends and enjoy an active lifestyle,
